

INFORMATION ON PROCESSING YOUR PRINT DATA

All of your print data is run through a **'premium check'**.

The data is checked in terms of:

YOUR PERSONAL PREMIUM CHECK*

- Usability
- Resolution
- Quality
- Technical feasibility

* Your data is personally checked by us (no automated 'preflight software')

PREPARATION FOR THE COMPLEX PRODUCTION PROCESS

1. Data storage, data backup and adding final data into the 'RATHGEBER ERP system'
→ Quality assurance during the production process and for future orders
2. Data conversion and data extraction for production and tool processes in our production facility
3. Display of required processing aids (transfer films, paper slits, removal aids, etc.)
4. Identification of further process steps of print results in draft form and also print finishes
e.g. embossing, keys and varnishes
5. Dimensioning of the layout for control purposes within a 'normal' scope (optional)
6. Creation and optimisation of panels in the production process (aligned with the production method)
→ This process encourages energy efficiency and economical use of materials
7. Colour separation for different print types, if necessary

ADDITIONAL CHECK INCLUDING:

- Indication of possible improvements of the design in terms of the final product and production method
- Creating print data based on drafts, templates, customer samples and technical drawings
- Adapting data according to technical feasibility of the product, considering customer design requirements
- Indication and correction of apparent typos (no guarantee)

STILL HAVE QUESTIONS?

Our graphics department will be happy to help you.
